- Water Filter Cartridges - For Commercial & Industrial Applications:

Water treatment filtration products offered by RAA is the highest quality filtration products ensuring our customers longer life of their components. With water filter cartridges ranging from 1- micron filtration all the way down to .1 micron, making them perfect for any pre and post treatment filtration requirement. RAA also carries all types of cartridge filtration housings in a large variety of sizes and filtering capacities. With our vast assortment of housings we can accommodate any flow rate and we can tailor a housing to withstand even the harshest of conditions for our customers.

RAA delivers an assortment of water filter cartridges which extend from applications such as industrial, commercial, municipal, chemicals, etc. Our cartridge filter housings are distributed in a great variety of sizes, capacities, contaminant removal media filters, that depend upon your application.

- Under Sink RO System

Our reverse osmosis system covers all issues of household water purification and completely replaces premium bottled water.

The quality of the incoming water does not matter, our RO membrane is a long-lasting shield against harmful substances including heavy metals, pesticides, nitrates, bacteria, and viruses.

The system completely removes hardness salts from the water, and provides a longer life for the coffee machine, kettle, iron, and steamer.

Actual appearance of the product may vary.

- RO Chemicals:

RAA delivers a full range of reverse osmosis chemicals, including antiscalant RO chemicals with the purpose of treating unwanted occurrences such as the formation of slime as a result of organic and inorganic substances that are found in water.

RAA provides high quality antiscalant which will effectively protect your membranes from fouling or scaling for a long period of time..
